## BACHELOR OF COMPUTER APPLICATION

Java Developer using Java technology also worked on technologies like MySQL Database, JDBC, Hibernate, SpringBoot, Postman. Seeking to secure a position as a Java Developer in a reputed organization.

## TECHNICAL SKILLS

- |               |        |              |
|---------------|--------|--------------|
| • HTML        | • Java | • MySQL      |
| • CSS         | • CPP  | • SpringBoot |
| • Java Script | • C    | • JDBC       |

## PROJECT

### Student Management System

#### Personal Project | Spring Boot, Java, HTML, CSS

- Developed a full-stack student management web application using Spring Boot for rapid backend development.
- Implemented CRUD operations (Create, Read, Update, Delete) for managing student records.
- Built RESTful APIs using Spring Boot and handled data processing with Java.
- Designed the frontend using HTML and CSS to create a clean, responsive UI.
- Integrated validation and error handling to ensure smooth user interaction.
- Followed MVC architecture and best practices for maintainability and scalability.
- Tools used: Spring Boot, Java, HTML, CSS, Maven/Gradle, Mysql.

### Resume Builder Web App

#### Personal Project | HTML, CSS, JavaScript

- Developed an interactive Resume Builder using HTML, CSS, and vanilla JavaScript.
- Enabled users to dynamically input personal, educational, and professional details.
- Designed a clean and responsive UI with custom styling using CSS.
- Implemented real-time preview and formatted output for downloadable resumes.
- Used JavaScript for DOM manipulation, data handling, and form validation.
- Focused on user experience, accessibility, and responsive design across devices.
